

## Chair Report

October 2022

Fellow Commissioners,

I requested Director Alvarez contact the Chief Justice's office again for an update on the appointment of our open Commission seat. She reported back that they were seeking additional nominations. Again, please forward the application to colleagues you believe would be a good fit for the Commission in this final year of the pilot and moving forward.

This month has been all about the report. I continue to attend Research and Data meetings as scheduled. Portions of the report are coming together. I am working on introductory materials including the formal introduction, background, and legislative history sections as well as case studies as they are made available. I completed another revision of the Table of Contents as we are continuing to strategize about the best flow of information in the report for ease of use by the legislators and for purposes of testimony. I have reviewed and provided questions and feedback on early drafts of the cost, quality of life and needs assessment sections.
